# We find the study that is right for you.

ClinicSelect connects you to clinical trials by taking in information about who you are and what you're looking for, then matching it up against available trials to find the best fit.

## It starts with you

First, you'll answer a few questions to help us understand who you are and which research studies are best suited for you.

## ClinicSelect finds your match

Based on your medical history, location, and what you're looking to get out of a clinical trial, we will work to find the right study for you.

## Make an informed decision

Speak directly with the research staff before you decide whether or not to participate in the trial to make an informed decision.

## Receive medical attention

If you choose to participate, you will receive clinical attention and care at no cost to you or your insurance throughout the study.

ClinicSelect is committed to rare disease funding & research.
